Fast Growing Technology Firm Opens Branch Offices in Atlanta, Boise & Boston

Ontario, CA., Apr. 28, 2020 – Trinity Networx, LLC, (https://www.trinitynetworx.com), a leading nationwide technology solution provider for small and medium businesses, opened new branch offices in Atlanta, GA, Boise, ID, and Boston, MA this month. The new locations allow Trinity Networx to expand its operations and establish a substantial local presence focused on offering its expertise to Atlanta, Boise, and Boston businesses. For over twelve years, Trinity Networx has been providing consistent, customer-oriented IT managed services. Trinity Networx' ability to implement, protect, diagnose, resolve, and maintain IT infrastructure that aligns with each individual business is the "secret sauce" to their continued success.

"The decision to expand our presence into Atlanta, Boise, and Boston was the next logical step after perfecting our service delivery model for our Southern California clients. Atlanta's, Boise's, and Boston's growing economy, coupled with our team's experience, solving technical problems, and forging relationships with the local business communities allows us to integrate them into our tribe" said Trinity Networx CEO, Lance Reichenberger.

Trinity Networx' ability to seamlessly deploy and integrate their management tools into an existing environment enables them to quickly resolve issues and answer questions without stepping foot inside a client's door. The last month or so of mandatory quarantine showcased Trinity Networx' ability to accommodate and help pivot organizations to working remotely. Trinity Networx assisted over 500 client team members in securely operating and functioning from home, keeping the small and medium business community operational despite the world pandemic.

Even though Trinity Networx excels at remote support, they are looking forward to meeting and integrating with business leaders in Atlanta, Boise, and Boston to provide a hybrid solution of remote and in-person interaction that will address all the client's technology issues. The Trinity Networx management team has over 60+ years of diverse IT.

About Trinity Networx

Trinity Networx is an Information Security and Technology (IT) services company specializing in small and medium businesses. We strive to identify your specific needs and then apply our expertise to optimize your company's IT infrastructure, security, compliance, data backup, disaster recovery, and business continuity. As part of our mission, we grind every day to become more than your IT vendor. With our robust experience and proven strategies, we share your interests and aim to become an integral part of your team.
